

Workshop on Astrochemistry in Star and Planet Formation

Date: February 16, 2016
9:30 – 17:30

Venue: RIKEN, Wako, Japan
(Chemistry and Material Physics Bidg., 5F, S507)

Scope of the Workshop

This workshop aims to discuss current progress and future trends of astrochemistry in star and planet forming regions. We mainly focus on observational studies with the state-of-the-art instruments including ALMA and NOEMA, astrochemical modeling, and related laboratory experiments.

Invited Speakers

Aikawa, Y. (Tsukuba U.)
Azuma, T. (RIKEN)
Cernicharo, J. (CSIC)
Hirota, T. (NAOJ)
Jiménez-Serra, I. (UCL)
Lefloch, B. (IPAG)
Nomura, H. (TITEC)
Oya, Y. (U. Tokyo)
Pineda, J. (MPI)
Podio, L. (Arcetri)
Roueff, E. (Paris)
Vastel, C. (IRAP)
Watanabe, N. (Hokkaido U.)

Organization Committee

Sakai, N. (RIKEN)
Ceccarelli, C. (IPAG)
Yamamoto, S. (U. Tokyo)
